

Eman Ahmed Ahmed AlJabeeri

Data Analyst | Business Intelligence Analyst | Power BI Developer

amonaahmed608@gmail.com | +2 01551371627 | Cairo, Egypt

[linkedin.com/in/eman-ahmed25](https://www.linkedin.com/in/eman-ahmed25) github.com/emanahmed-ai

PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in business intelligence, data visualization, and dashboard development using Power BI, SQL, Excel, and Python. Skilled in data cleaning, exploratory data analysis (EDA), statistical analysis, and KPI reporting to turn raw data into actionable business insights. Complements core analytics expertise with practical Machine Learning and Deep Learning project experience — including predictive modeling, classification, and computer vision — to support data-driven decision-making across business and technical contexts. Passionate about solving business problems through data and continuous learning in analytics, BI, and AI.

EXPERIENCE

Data Analyst Trainee

National Professional Data Initiative

December 2025

- Performed data cleaning, validation, and transformation using Python, SQL, and Excel.
- Conducted exploratory data analysis to identify patterns and business insights.
- Developed dashboards and reports using Power BI and Tableau.
- Applied statistical techniques to support data-driven decision-making.
- Presented analytical findings to stakeholders in a clear and business-focused format.

PROJECTS

Business Intelligence Project: International Sales Performance

Power BI | Excel | Power Query | Data Modeling

- Developed an end-to-end Business Intelligence solution to analyze global sales performance across multiple regions and product categories.
- Performed ETL processes using Power Query to prepare and transform transactional datasets.
- Built executive dashboards featuring KPIs, revenue trends, and regional performance analysis.
- Generated insights from sales operations and monitored more than \$11.8M in revenue.

Hospital Management Database & BI Analytics System

SQL | Power BI | ERD | Power Query

- Designed and normalized a relational database to manage hospital operations, including patient records, admissions, doctor scheduling, and billing.
- Implemented optimized SQL schemas with primary and foreign key relationships.
- Integrated SQL databases with Power BI to automate reporting and dashboard creation.
- Developed healthcare KPIs to analyze patient demographics, occupancy rates, and revenue performance.

Solar Power Executive Dashboard

Power BI | SQL | DAX

- Built an interactive executive dashboard to track daily solar power generation and system efficiency across multiple plant locations.
- Used SQL to consolidate site-level data and DAX to build KPI measures for performance monitoring.
- Designed regional breakdowns and visualizations to support operational decision-making.
- Reduced manual reporting time by 40% through automated dashboard refreshes.

Solar Guardian AI (SPARK) – Predictive Maintenance

Python | XGBoost | Streamlit

- Analyzed high-frequency solar panel sensor telemetry to predict equipment failures and maintenance needs.
- Built a machine learning pipeline using XGBoost on a dataset of 50,000+ sensor readings.
- Developed a Streamlit interface to make predictions accessible for monitoring and reporting.
- Achieved 93% predictive accuracy, supporting proactive maintenance scheduling.

Thyroid AI – Diagnostic Risk Classification

Python | Scikit-learn | Random Forest

- Processed clinical laboratory diagnostic data to evaluate and classify thyroid disease risk levels.
- Built a classification model using Scikit-learn and Random Forest across 3,000+ patient records.
- Achieved 95% accuracy (F1-score: 0.94), supporting early screening decisions.
- Applied feature engineering and model evaluation techniques to improve diagnostic reliability.

EcoSport AI – Automated Waste Classification

Python | Porch | YOLOv8

- Designed a real-time computer vision system to classify recyclable materials from live image feeds.
- Built and trained a detection model using PyTorch and YOLOv8 across 5 major waste categories.
- Achieved 89% mAP at 30 FPS, enabling real-time sorting decisions.
- Supported automated waste management workflows through image-based classification.

TECHNICAL SKILLS

- **Data Analytics & BI:** Data Cleaning, EDA, Data Visualization, KPI Reporting, Business Intelligence
- **Programming:** Python, SQL
- **Libraries:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn
- **Machine Learning:** Regression, Classification, Clustering (K-Means), Feature Engineering, Model Evaluation
- **Tools & Visualization:** Power BI, Tableau, Excel (Advanced), Jupyter Notebook, Git & GitHub
- **Databases:** MySQL, SQL Server

EDUCATION

Artificial Intelligence & Data Analysis Diploma

Ministry of Communications and Information Technology (MCIT)

December 2025

Bachelor's Degree — Faculty of Arts

Tanta University

| 2018–2021, Graduated: 2021

CERTIFICATES

- Google Data Analytics Professional Certificate
- Machine Learning with Python – IBM
- Generative AI Language Modeling with Transformers – IBM
- Harnessing the Power of Data with Power BI – Microsoft
- Preparing Data for Analysis with Microsoft Excel – Microsoft
- Foundations for Big Data Analysis with SQL
- Introduction to Data Analysis Using Python

RELEVANT COURSEWORK

Data Analysis • Statistics • Database Systems • Business Intelligence

CAREER OBJECTIVE

Recent graduate seeking a Junior Data Analyst position to apply analytical, statistical, and data visualization skills to support data-driven decision-making and contribute to organizational growth.

INTERNSHIP / TRAINING

- Worked on real-world datasets for analysis and reporting.
- Wrote SQL queries to extract and manipulate data.
- Created dashboards and reports for stakeholders.

SOFT SKILLS

Strong analytical & problem-solving skills • Excellent communication & presentation • Team collaboration • Time management • Business English

Language

- Arabic native
- English very good
- French good
